Introducing
the *Astra*
Integrated Reader

The RFID Blog

The business of finding digital data is booming. Most of us type search terms into a 2-inch wide box several tens or hundreds of times a day...

Products & Services

Embedded RFID Readers

ThingMagic's family of UHF RFID modules allow solution providers to create application-specific devices with astonishing performance in a trim package.

Astra Integrated Reader/Antenna

Low profile, easy to install, integrated enterprise UHF RFID reader designed for use in office and commercial environments.

Fixed RFID Readers

The Mercury family of UHF RFID readers are ultra high performance application platforms which integrate seamlessly with industry-leading RFID data collection and processing infrastructures.

Custom RFID Solutions

ThingMagic's ADG offers consulting services to transform your vision into reality and create sustainable competitive advantage for your company. We offer services ranging from characterizing tags to design and implementation of complete RFID systems including application software.

RFID Developer Kits

MercuryDevKit contains all the components necessary to begin reading and writing RFID tags using a ThingMagic Mercury4e, Mercury5e, or M5e-Compact RFID embedded reader module.

Featured Solutions

Lexmark Adds RFID to Laser Printers

Lexmark embeds ThingMagic's M5e RFID reader in a drawer designed as an add-on for Lexmark T640, T642 and T644 laser printers.

Ford Tool Link by Dewalt

Ford, Dewalt, and ThingMagic collaborate to create RFID enabled pickup trucks and vans.
