## Motivation

Remote work is on the rise since the start of the COVID-19 pandemic.

Despite being college-educated, many Autistic people are unemployed.

Autistic people become easily exhausted from expressing and interpreting emotions.

## Our Solution

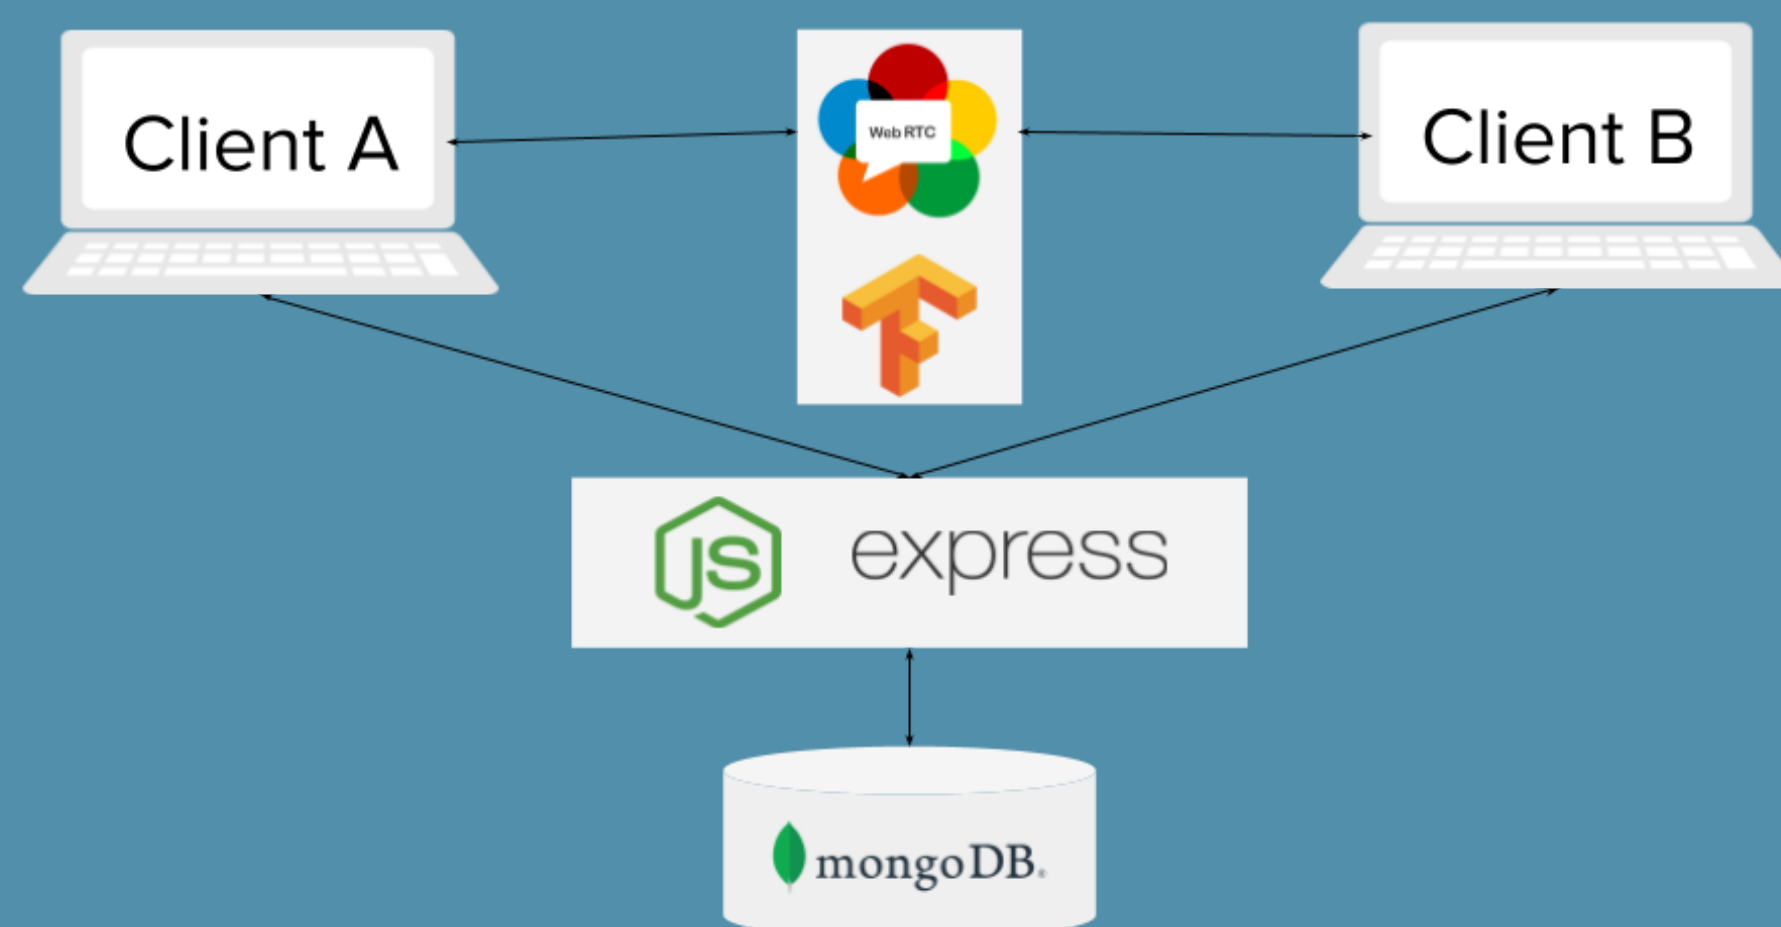

**Customizable UI** allows them to eliminate any visual stressors that distract them from conversations.

**Real-Time Sentiment Analysis** help them understand and identify emotions.

*A video conferencing platform designed to help Autistic people enhance their social skills and succeed in the workplace.*

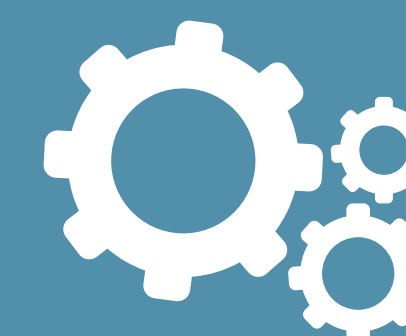

## Architecture

## Innovation

**P2P Technology**  
No servers are needed since video calling and sentiment analysis are client-side.

**Self Tuning Model**  
We update ML models with new training data as the product is being used.

**Code Simplicity**  
The simple code needed to integrate a ML model fits in an index card.
