

CS 240A Final Project

- What is it?
 - Significant parallel implementation / experiment by team of students
 - Performance / tuning will be part of grade
 - Can parallelize existing serial code (from research, public domain, etc.)
 - Can leverage your other classes or research (but check with me first)
 - See web page for some ideas
- Teams? What teams?
 - Two or three people each
 - Interdisciplinary (at least two departments represented on each team)
- What do I need to do?
 - Web page: evolving description of project status and results
 - Proposal: web link, team members, topic, one paragraph, due May 7
 - Progress report: one page, due May 19
 - Presentation: 15 minutes, in class, June 2
 - Demo: 15 minutes, in GSL, June 4
 - Paper: 8-10 pages, due June 7
