

GCMPS 266 - Formal Specification and Verification

More Axiomatic Definitions of Pascal

D5: $\frac{\text{procedure } p(V; \text{ var } X); S, \quad P\{p(V, X)\}R \mid - \quad P\{S\}R}{P\{p(V, X)\}R}$

D6: $\frac{\begin{array}{c} P\{p(V, X)\}R \\ K, \quad X, V \end{array} \quad \begin{array}{c} K, \quad X, V \\ \{p(E, A)\}R \\ K', A, E \end{array}}{P \quad \quad \quad K', A, E}$

D7: $\frac{P\{p(E, A)\}R}{(P \& \forall A (R \rightarrow Q)) \{p(E, A)\}Q}$

Note: "&" is logical AND, and X, Y, A, E, K, and K' represent a vector of values.
