

The background of the entire image is a dense pattern of stylized leaves. The leaves are outlined in thick black lines and filled with various colors: light cream, bright orange, brown, and magenta. Some leaves have internal vein details drawn with thin black lines. The overall style is graphic and artistic.

Creating Web Illusions

Web Arts #4 – Web Illusions
By Yanju Chen

HELLO~

Bc

Basic CSS Tutorial for Web Artist

WHAT IS HTML?

HTML is written in the form of HTML elements consisting of tags enclosed in angle brackets (like `<html>`), within the web page content. HTML tags most commonly come in pairs like `<h1>` and `</h1>`, although some tags, known as empty elements, are unpaired, for example ``. In between these tags web designers can add text, tags, comments and other types of text-based content.

The purpose of a web browser is to read HTML documents and compose them into visible or audible web pages.

Raw Web Written By HTML

WHAT IS CSS?

CSS is an acronym for Cascading Style Sheets.

CSS is a style language that defines layout of HTML documents. For example, CSS covers fonts, colours, margins, lines, height, width, background images, advanced positions and many other things. Just wait and see!

HTML can be (mis-)used to add layout to websites. But CSS offers more options and is more sophisticated. CSS is supported by all browsers today.

Web with CSS Decorated

WHERE IS CSS?

It can be:

1. Inside the HTML Document

- Inline
- `<p style="font-size: 10px; color: #FFFFFF;"></p>`
- Inside
- `<style type="text/css"></style>`

2. Outside the HTML Document

- `<link rel="stylesheet" type="text/css" href="http://www.dreamdu.com/style.css" />`

3. Nowhere

- Use the Browser Defaults

```
<meta content="noindex" name="robots">
<meta itemprop="image" content="/images/google">
<title>Google</title>
▶ <script>...</script>
▶ <style>...</style>
▶ <style id="gstyle">...</style>
▼ <style>
    .lst-t{width:100%;}.kpbb,.kprb,.kpgb,.kpgrb{
    </style>
▶ <script>...</script>
▼ <style type="text/css">
    .gssb_c{border:0;position:absolute;z-index:98
    </style>
</body>
```
